US Citizenship Required

Applicants selected will be subject to a government security investigation and must meet eligibility requirements for access to classified information.

Title

Electronic Warfare Analyst

Requisition Number

F-2530

Description

This is an exciting opportunity to work with advanced techniques in electronic warfare using modeling and simulation. Work with the current modeling and simulation techniques and lead the expansion of that work to include a wide range of effects through many on many modeling. Lead the use of EADSIM to analyze ship based electronic warfare. Assist with the current analyses, determine the directions where many on many modeling can be applied, and determine growth directions for EADSIM for this work. US citizen, current SECRET clearance, current TS/SCI clearance is a plus.

Education Required

BS in engineering or math, advanced degrees helpful.

Years Experience Required

10

Experience Required

Experienced in radar and electronic warfare analysis. Demonstrated capability in use of EADSIM. Experience in military scenario development for multiple warfare areas. Experience in implementing these scenarios in EADSIM. Experience in developing analysis reports from the use of EADSIM.

Skills Required

The ideal candidate will have strong analytical skills, knowledge of electronic warfare analysis techniques, be able to work both independently and in a team environment, have strong written, verbal, and interpersonal communication skills including presentation preparation, and strong aptitude for modeling and simulation.

Work Location

Washington, DC United States
